

## Problem Statement

People with curly hair need better solutions to keep their curls defined throughout the day. As laying on surfaces or just everyday life tends to mess up curls.

## Details

When waking up and doing your hair it usually looks good. Your curls are defined and it's in the shape you want it. As the hours go on there are many things which mess up your hair such as weather and just resting your head on something. Your hair ends up frizzy and all over the place and this is annoying as all the work you went through to do your hair is gone.
